

ABSTRACT OF THE DISCLOSURE

[0029] A cover for a fan blade. The cover includes a sleeve having an open end for receiving the fan blade. The sleeve has hook and loop fasteners that are configured to engage each other to secure the sleeve about the fan blade. The cover also includes an ornament and connection features extending from the sleeve and the ornament. The connection features engage each other to connect the ornament to the sleeve such that, as the fan blade rotates, the sleeve and ornament rotate therewith.
